

QuickFlex Cubes™

vari®

The Cubicle Reimagined

The way we work has changed; it's time for cubicles to change, too. Introducing QuickFlex Cubes™ from Vari®. These light, interlocking panels and connectors allow you to quickly add workstation privacy, collaboration hubs, focus pods, and more without the hassle or expense of old-fashioned cubicles.

Modular Cubicles

Reduce visual distractions, create privacy for workstations, and bring smart space division solutions to your office design.

Quiet the Noise

The fabric finish and high-density foam core allow the panels to absorb and dampen sound, helping control noise levels in the office.

Durable, Tackable Material

Individual spaces can be personalized by using thumbtacks to hang notes, pictures, or decorations on the panels. The durable polyester fabric has been treated to resist stains and be water repellent, making panels easy to clean and maintain.

Ultimate Adaptability

With one-piece panels and simple L, T, and X connectors, QuickFlex Cubes™ can be configured and customized in an unlimited number of ways.

Accessorize Your Area

Bring convenience, storage, and personalization to each workspace with our top-mounted accessories, designed exclusively for QuickFlex Cubes™. Options include a Hook (*pictured*), Hanging Shelf, Marker Board, Pen Holder, and Top Shelf.

Quick Assembly

Constructed with a durable steel frame, panels have QuickFlex connection points that lock together without screws or special tools.

On the Level

Panels ship with easy-to-adjust feet pre-installed, making it simple to accommodate uneven floors.

For enhanced stability at the end of a run, a wider foot is available.

Power Up

Power sources can be integrated into QuickFlex Cubes™ with a simple plug-and-play solution.

Data cables can also be routed as needed.
