WORKING TOGETHER

Great office design is about more than desks. It's the shared spaces where people can collaborate, connect, and learn that bring an office to life. That's why we developed a curated collection of soft seating, meeting tables, and accessories to create spaces people want to work in.

Create space for dining, solo work, casual meetings, or social events and celebrations by mixing tables of multiple sizes, shapes, and heights

Position conference tables in an open area for informal meetings or to encourage group lunches

Combine soft seating with tables and side chairs to create places for relaxed work or engaging conversations with teammates

SHARED SPACES

Collaborate

Collaboration spaces, like formal conference rooms and casual meeting spaces, give teams places to present and share ideas.

Connect

Break rooms and comfortable sitting areas give people a place to sit, talk, and connect with each other.

Learn

Learning environments like training rooms and educational spaces bring teams together for instruction and development.

COLLABORATE

Collaboration Spaces

Thoughtfully designed spaces give teams a place to share ideas, solve problems, and work together towards a common goal. Traditional conference rooms provide a formal setting for meetings and can be scaled to accommodate groups of all sizes. Casual meeting spaces furnished with modern soft seating can be both functional and comfortable.

CONNECT

Connection Spaces

There's no substitute for human interaction. Whether having a one-on-one meeting or bringing teams together in a comfortable environment, spaces that foster connection in the office are important. These spaces where people can talk, share, and recharge can make a big impact on an organization's culture and even help boost employee morale.

LEARN

Learning Spaces

Training spaces and classrooms provide a dedicated environment for people to learn new skills and share knowledge. By investing in flexible training spaces that can be easily reconfigured, organizations can create a culture of learning and get more value out of their space.
