- 7. 45" (114.5 cm) (Highest)
- 6. 44" (112 cm)
- 5. 43" (109 cm)
- 4. 42" (106.5 cm) (Recommended)
- 3. 41" (104 cm)
- 2. 40" (101.5 cm)
- 1. 39" (99 cm) (Lowest)

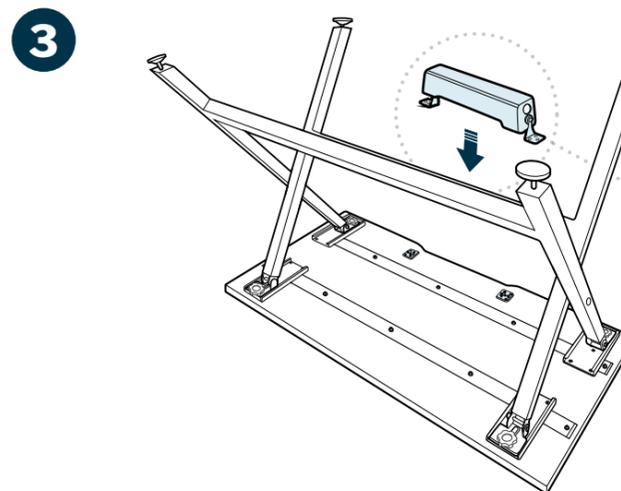

Table top and legs will arrive in separate boxes. Assemble the table with the table top face down in the box to prevent any surface scratching. Open the table top box and fold down all the cardboard box flaps. Remove the legs from their box. To ensure proper alignment, it's important to use the included cardboard guides to line up the legs at the track and slide the leg joints over the connection points. The table can be adjusted to one of seven heights.

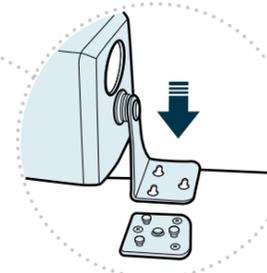

2

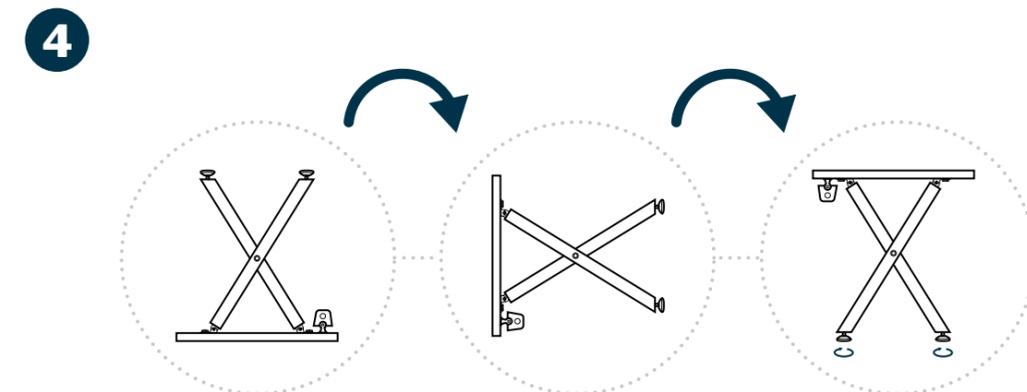

Once you've selected your preferred height setting, use the hand bolts to secure and tighten the legs into place. Remove the cardboard guides.

3

Find the cable management tray. Slide the tray into the notches above the bracket and push until it clicks, indicating it's locked into place.

4

With one person on each side of the table, hold the legs and turn it on its side. Then turn the table into a fully upright position by holding the table top and turning it up onto its feet. Rotate the footpads to level the table as needed.

NOTICE: To readjust the height setting at any point, the table will need to be turned upside down.

WARNING: Risk of finger injury—pinching hazard. Use caution when folding or assembling base.
