1

Remove chair, air piston, foot ring, and base from the packaging. With the large end down, insert the piston through the foot ring (holes facing down) and into the base. With the piston firmly in place, slide the foot ring to the desired position, and turn the attached knob to the right to secure in place.

2

If the piston has a protective cap on the top, remove it before proceeding. Line up the hole underneath the seat with the top of the piston and base assembly. With another person's assistance, carefully lower the chair back onto the piston. Using even pressure, press down firmly on the seat cushion a few times to ensure the seat is fully engaged with the piston.

Once assembled, do not attempt to disassemble the chair, as doing so could damage the product.

WARNING: To prevent injuries and product failure, do not use this chair for standing, climbing, or leaning. Do not use if the chair is damaged or incorrectly assembled.

Adjustment Settings

To adjust arm height, use the button under the armrest and pull up or push down.

To angle the arms or slide arms from front to back, push arms accordingly.

To adjust seat height, use the lever under the right side of the seat.

To adjust foot ring height, turn the attached knob to the left to loosen the ring, move the ring up or down to the desired position, and turn the knob to the right to secure in place.
